

KRIANGRIT BOONSAWA

Legal Officer | Contract Officer | Legal Advisor

Kriangrit.Bsw@gmail.com | 094-939-9251 | Bangkok, Thailand

PROFESSIONAL SUMMARY

Legal Officer with regulatory compliance oversight, 5+ years of experience in legal and regulatory compliance, contract management, and in-house legal advisory supporting the development of back-office systems. Experienced in direct coordination with government authorities including the OIC, DBD, Revenue Department, and Land Department. Skilled in providing legal advisory to various departments within the organisation. A track record of identifying operational inefficiencies and independently developing automation solutions — including AI-assisted workflows using Google Apps Script and Gemini API — that reduce manual workload and strengthen compliance controls across the organisation.

WORK EXPERIENCE

Legal Officer

August 2023 – Present

Ocean Life Insurance Public Company Limited | Legal Office

Consultant Section — Core Responsibilities

- Monitor daily legal and regulatory developments affecting the company's business; prepare impact summaries and notify relevant departments to ensure timely compliance.
- Provide legal advisory to various departments within the organisation on regulatory matters, internal policies, and compliance requirements.
- Provide legal opinions on new insurance product development prior to submission for approval to the regulator (OIC).
- Review and provide opinions on product-related documents for internal use.
- Review advertising and PR materials for compliance with relevant regulations prior to publication.
- Serve as a primary legal point of contact for internal business units, responding to day-to-day legal inquiries across the organisation, covering operational, HR, and commercial matters.
- Coordinate resolution and formal responses to customer complaints filed with the OIC, to protect the company's interests.
- Coordinate company registration filings and submissions to government agencies including the DBD, Revenue Department, and District Office.

Legal Technology Projects (Self-Initiated & Team)

- **Project 1 — OIC Compliance Email Automation System (Deployed)**
 - Built a semi-automated workflow using Google Apps Script to manage incoming OIC policyholder verification requests end-to-end.
 - System auto-detects OIC email requests, logs case data into a shared Google Sheet registry used by 3 divisions simultaneously, eliminating manual entry and reducing risk of missed cases.
 - Auto-generates and dispatches standardised response emails (~85% of all inquiries) after review by the Legal Office.
 - Processed 800+ OIC email threads covering ~1,200 individual verification requests in the first half of 2026.
- **Project 2 — Standard Contract Generation System (In Development)**
 - Developing a system that detects incoming contract request emails from departments and initiates an automated contract generation pipeline.
 - Integrates Gemini API to perform OCR on attached documents, extracting contract party details and flagging any fields requiring manual verification before proceeding.
 - On approval, the system auto-populates the company's standard contract templates with extracted data and generates a draft PDF for review.
 - A secondary Gemini API call then validates the generated contract against the standard template and cross-checks party information against the original source documents before finalisation.
- **Project 3 — Centralised Bankruptcy Status Database (Team Project)**
 - Team member contributing to the development of a bankruptcy screening system accessible to all departments conducting customer transactions.
 - Centralises daily bankruptcy data into a shared lookup system, enabling real-time verification before executing transactions with customers.
 - Reduces compliance risk by preventing the company from entering legal relationships with bankrupt individuals, while accelerating transaction processing across departments.
- **Project 4 — AI-Powered Legal Advisory Chatbot (Team Project)**
 - Identified a recurring pattern of repetitive legal inquiries from operating departments to the Legal Office, consuming significant attorney time on previously answered questions.
 - Compiled the Legal Office's full archive of past legal advisory responses and used them to train a custom AI Chatbot for internal use.
 - Deployed as a self-service tool allowing departments to query common legal questions directly, improving response speed and freeing up the Legal Office for higher-complexity matters.

Contract Section (Secondment, 5 months)

- Drafted, reviewed, and negotiated corporate business contracts, including lease agreements, service agreements, MOUs, and group insurance policies.
- Coordinated corporate registrations and filings with government agencies: Revenue Department, DBD, Land Department, and District Office.
- Conducted legal research and provided advisory opinions on contract terms and internal company regulations.

Paralegal

November 2019 – July 2023

Vichit and Friends Law Office

- Prepared legal pleadings and compiled comprehensive case files for civil and commercial court proceedings.
- Managed registration submissions and applications to government agencies on behalf of clients.
- Conducted legal research supporting attorney consultations, case strategy, and client advisory.

Legal Intern

April 2021 – September 2021

Lawyer Association of Thailand

- Performed legal research to support client consultations under supervising attorneys.
- Gained practical experience in legal advice and individual client counseling.
